

New Partnership Announcement: Testeract Teams Up With WATS To Enhance Test Automation Solutions

Drammen, Norway and Draper, Utah, 29th June 2023 – Testeract, a leading provider of automated test solutions, is thrilled to announce a partnership with WATS, a cutting-edge data analytics platform for test systems. This collaboration will provide test engineers with powerful insights and enhanced capabilities to streamline their testing processes and gain a competitive advantage.

Testeract offers system integration and a comprehensive automated test software framework that enables test engineers to create robust, flexible, and scalable automated test systems. By significantly reducing development time, Testeract allows organizations to optimize their testing procedures efficiently.

"We are excited to partner with WATS to provide our customers with an unmatched testing solution," says Jayson Wilkinson, Director of Marketing, Testeract. "By incorporating WATS into our test automation framework, we empower our customers to harness the power of their data and gain a significant competitive advantage in their respective industries."

"Testeract has a wealth of automated test experience and tools to quickly deploy test systems with their customers and we're delighted to be their partner." says Chris Nelson, Director of Virinco Americas. "With the addition of WATS in their toolbox, they can now provide their customers and suppliers full visibility and traceability to their manufacturing test operations."

About Testeract:

Testeract is a systems integrator and leading provider of automated test solutions. Their automated test framework enables test engineers to create powerful, flexible, and scalable automated test systems while drastically reducing development time. www.testeraact.com.

About WATS:

WATS is a revolutionary Test Data Management solution that has assisted thousands of users worldwide, processing over 80 billion data points. With WATS, you can transform your Manufacturing and Repair Data into actionable insights through advanced analysis. It is a pioneering data analytics platform for test systems, empowering organizations to make informed decisions and improve operational efficiency by unlocking valuable insights from their test system data. www.wats.com
